I am going to use a game with cards to ask about activities that people do. The method ensures that your answers are completely anonymous. Each time I will show you a card, and you look at the list of things on it. I will then ask HOW MANY of these things you have done over the past 12 months. I don't want to know which ones, just how many.

13. I will start with a question on animals to show you how the method works. Can you tell me how many of these animals you have seen in real life (not on TV, facebook, computer or phone) over the past 12 months? Please do not tell me which ones you have seen.

   Answer:

14. The next list is about transportation. In the past year, how many on this list have you done? Do not state which you have or have not done. Just how many.

   Answer:

15. The next list is about medical treatments. In the past year, how many of the following have you done? Do not state which you have or have not done. Just how many.

   Answer:

<OK that is the end of the card game>

16. a. Thinking of your closest family and friends, what percentage (between 0-100%) of them do you think use bear parts or products for medicine or other purposes? Please circle one below – if you don’t know, please guess.

   0-20%  21-40%  41-60%  61-80%  81-100%
16 b. How many of your close friends do you know for certain have used/consumed bear parts for medicine or other purposes?

Answer: ____________ (if “0” write N/A and skip to 17. If “1”, go to question 16 c. If more than one, ask the interviewee to write down their friends' initials on pieces of paper and then select one friend. Note: the pieces of paper will be disposed of. Then ask question 16 c in relation to that one person).

16 c. Other than you, how many other people do you believe know that the nominated friend has used bear parts or products for medicine or other purposes?

Answer: ____________
